

**NEW**

# COUPLINGS...

Thumb-latch is available in stainless or plastic construction

Standard FDA grade Buna-N o-rings (others available)

Built-in end terminations available with hose barbs, pipe threads, compression nuts & more

Available with or without internal shut off valves

All springs are stainless steel

## ...AT LAST A CHOICE!

# LINKTECH™

QUICK COUPLING SOLUTIONS

## Interchangeable with many other leading couplings in the market place

### LinkTech 20AC Series

(Tubing Size = 1/16"-1/4") These 1/8" flow size couplings are produced in a durable natural DuPont™ Delrin® thermal plastic. Available in 61 different standard configurations.

### LinkTech 20CB Series

(Tubing Size = 1/8"-1/4") Produced in food grade chrome plated brass, these 1/8" flow size couplings are more durable and withstand higher pressure. Available in 56 different standard configurations.

### LinkTech 40AC Series

(Tubing Size = 1/4"-3/8") These 1/4" flow size coupling series are produced in a durable natural DuPont™ Delrin® thermal plastic. Available in 62 different standard configurations.

### LinkTech 40CB Series

(Tubing Size = 1/4"-3/8") Produced in food grade chrome plated brass, these 1/4" flow size series are extremely durable and withstands higher pressure. Available in 67 different standard configurations.

### LinkTech 50AC Series

(Tubing Size = 1/4"-3/8") Produced in a durable natural DuPont™ Delrin® thermal plastic. Utilises a more cost efficient plastic thumb-latch design. Available in 36 different standard configurations.

### LinkTech 50GP Series

(Tubing Size = 1/4"-3/8") Produced in a high performance glass filled polypropylene. Excellent chemical resistance properties. Available in 10 different standard configurations.

### LinkTech 65GP Series

(1/2" Flow) Produced in a durable glass filled polypropylene. Maximum full flow design. Available in 3 different standard configurations.
