

THE WEST GROUP LIMITED

Design & Supply of Fluid Control Solutions & Components

The West Group Ltd specialise in design and supply of fluid components to the medical and scientific markets. We have been providing products for the conveyance/direction of fluids and gases for various industries for over 40 years.

We are committed to providing the best customer service experience possible for the miniature medical and scientific fluid markets and our mission is to offer outstanding design skills, value added services and product variety to the markets we serve.

Our unique portfolio of products, many exclusive to the group, is complimented by our ability to both design and manufacture components to meet specific applications.

This is an exciting period of growth for our Company and we are on the lookout for exceptional Engineers to expand our Engineering team at The West Group Ltd.

We would be interested to hear from candidates with experience in the following areas:

- R&D, including full Life Cycle & Project management
- Experience in the Design of Pneumatic Components including Valves, Regulators, Manifolds & Solenoids
- Experience in the Design of Injection Plastic Moulding
- Medical Device design including ISO 13485
- Design for Manufacture, Six Sigma, DFMEA/PFMEA, FEA Analysis

The West Group believe in investing in their people and provide opportunities for staff development and training, alongside a market rate salary with a generous benefits package. This includes 5 days additional holiday per year, a monthly staff bonus scheme, pension, life assurance and private medical cover. Many other smaller benefits like free parking are also available.

Location: Based at the company's main manufacturing site in Waterlooville, Hampshire. This is close to the main A3M and M27 motorways and easily accessible by public transport.

If you feel you have relevant experience, then please email your CV with a covering email to Andy Willey, Engineering Manager (awilley@westgroup.co.uk).
